

Postdoctoral associate in plant/ecosystem ecology of grasslands

A two-year position is available, starting February 2006, to examine environmental controls, including herbivory and soil moisture and fertility, on C fluxes in grasslands of Yellowstone National Park. The postdoc will be expected to spend 6 mos. of each year in Yellowstone Park conducting field research and the remainder of each year at Syracuse University. A Ph.D. in ecology or related field and an ability to work well with graduate students and technicians is required. Salary is commensurate with qualifications. Applicants should send cover letter describing relevant training and experience, CV, and arrange for three letters of reference to be sent to: Doug Frank, Biological Research Labs, Syracuse University, Syracuse, NY 13244-1220, or electronically to dafrank@syr.edu. Applications received after December 22, 2005 may not receive full attention.
