

Position Announcement

Ecological Research Technicians

The S.M. Stoller Corp. has positions available for students to work as paid technicians on multiple ecological research projects. Ecological projects include studies of fire ecology, vegetation dynamics, avian surveys, and contaminant transport. The positions are temporary, full-time for the 2005 field season.

Qualifications: Preference will be given to college students (juniors and seniors preferred) with a minimum cumulative G.P.A. of 3.0 (on a 4.0 scale) in biology, range management, wildlife science, environmental science, ecology or related major. Higher consideration will be given to those with experience identifying sagebrush steppe vegetation. Candidates must be mature, responsible and able to work with a minimum of supervision. Technicians will be working with multiple research projects so flexibility is a must. Experience with fieldwork is desirable.

The work term will be during summer 2005. Employment start and end dates are flexible (late May to mid-August). The primary work location will be at the Idaho National Engineering and Environmental Laboratory, which is located 45 miles west of Idaho Falls. Excellent nearby outdoor recreation opportunities exist.

A cover letter, resume, transcripts and three letters of reference should be sent to:

Mr. Douglas K. Halford
S.M. Stoller Corporation
1780 First Street
Idaho Falls, Idaho 83401
dhalford@stoller.com
Voice: (208) 525-9358
Fax: (208) 525-3364

E-mail letters of reference will be accepted.

Deadline for the receipt of applications is March 15, 2005 or until filled.

Questions should be addressed to Dr. Roger D. Blew at rblew@stoller.com or visit the Environmental Surveillance, Education and Research Program web page at www.stoller-eser.com.
