

Assistant or Associate Professor of Plant Ecology

The Department of Natural Resources and Environmental Science, University of Nevada, Reno, is searching for an Assistant or Associate Professor of Plant Ecology with expertise at the population and community scales and capable of developing basic and applied research programs in rangeland ecology in the semiarid Great Basin. The individual is expected to assume an active instructional and advisory role in our undergraduate Forest and Rangeland Management major and related student organizations, to teach both undergraduate and graduate classes relating to rangeland ecology and management, and to participate in one or more interdisciplinary graduate programs. The position is approximately 60% research and 40% formal teaching. The candidate must have a Ph.D. in plant ecology or closely related field, expertise at the population and community scales, and the ability to integrate research and management activities across multiple temporal, spatial, and biological scales. Candidates must possess strong written and oral communication skills, the capability to develop an externally funded research program, and a documented commitment to excellence in undergraduate/graduate teaching and advisement. Post doctoral or equivalent experience is preferred. Contact Ms. Heidi McConnell (775-784-4020; hmc@cabnr.unr.edu) or Dr. Dale W. Johnson, Committee Chair, (775-784-4511; dwj@cabnr.unr.edu) for application information. Application deadline is 1 December 2005.
