

Restoration ecologist post-doctoral position at USDA Forest Service
Rocky Mountain Research Station, Boise, ID

The USDA Forest Service, Rocky Mountain Research Station, Shrubland Biology and Restoration Research Work Unit invites applications for a 2-year term post-doctoral Restoration Ecologist (GS-11) position. The scientist will be stationed at the Aquatic Sciences Laboratory (<http://www.fs.fed.us/rm/boise/>) in Boise, Idaho. The scientist will conduct research on establishment requirements, species interactions, and technology for re-establishing native species on disturbed lands of the Great Basin.

Qualifications:

Ph.D. in restoration ecology, plant ecology, range science, watershed science, or a related discipline

Experience in restoration of grasslands or shrublands

Knowledge of restoration techniques, ecology of Intermountain shrublands, invasive species biology, soils

Experience in initiation, implementation, analysis and publication of ecological research; strong quantitative skills

Application: Your curriculum vitae, official transcripts from all universities attended, publications, a statement of qualifications and interest, and a list of three references with email addresses and phone numbers.

Deadline: Applications will be accepted until the position is filled.

Position Available: July 15, 2006

Please send application materials to: Dr. Nancy Shaw, USDA Forest Service, Rocky Mountain Research Station, 322 E. Front Street, Suite 401, Boise, ID 83702 or electronically to nshaw@fs.fed.us
