

## **Research Technician**

The Range Ecology program at the Texas A&M Research and Extension Center in Uvalde has an immediate opening for a full-time Research Technician. The technician will participate in on-going projects in fire ecology, juniper and salt cedar water use, and grazing distribution. Primary responsibilities will be in the juniper and salt cedar water use studies. There will be an opportunity to participate in the fire ecology and grazing distribution studies. Research is conducted in the brush country of south Texas, the Hill Country of the Edwards Plateau, and along the Pecos River in west Texas.

Familiarity with electronic dataloggers or geographic information systems is desired but not required. There will be a small amount of overnight travel required with this position, but substantial daily travel. The position will be evenly split between field work and office/laboratory work.

Education: B.S. in Range Management, Wildlife Management, Ecology, or closely related field

Location: Uvalde, Texas

Salary: Commensurate with education and experience

Benefits: State contribution towards health, retirement.

Closing date: August 1, 2006

Send resume, transcripts, and the names of 3 references to:
